How can I swap my Tokens?

Anna Zozulenko - 2025-07-01 - Wallet

In order to process your swap transaction please note that the network fee will be calculated in % on the amount you swap from and paid in Ethereum (ETH).

Navigate to the "Menu" icon located at the bottom right corner of the screen and click on it.

Click on the displayed current value of your assets.

Click on the "Swap" icon in between the Payin and Payout.

Select the token you want to swap from and swap to in the dropdown menu in "You Pay" and "You Get".

Type in the amount you would like to swap in "You Pay" and the equivalent will be displayed in "You Get".

Click on the button "Swap" and confirm your action.

Network fees will be equivalent to 6.5% to swap to other tokens and 2.5% to swap to LWC. Make sure you have enough balance in your internal wallet to proceed with the swap.
