What is AUSDT?

Anna Zozulenko - 2025-06-06 - Wallet

AUSDT is a stablecoin issued on the ALLTRA SmartChain, maintaining a 1:1 parity with USD. It is fully backed and insured to ensure stability and minimize volatility risks.

AUSDT is specifically integrated into the Linework ecosystem and is backed by the **NIISITAPI Sovereign Bank (NSB)**, making it a secure and reliable asset for transactions within Linework.

AUSDT is built on the **ARC-20 token standard**, following the **Bitcoin UTXO model** for enhanced security and **Binance SmartChain compatibility** for seamless transactions.
