## What types of wallets can I connect to the app?

Anna Zozulenko - 2025-04-09 - Wallet

Our app currently supports **ETH-compatible wallets** only.

To connect your wallet:

- Go to the **Wallet Connection** inside the Bank section.
- Check the list of supported wallets displayed.
- Select your preferred wallet and follow the connection steps.

If you're unable to connect your wallet:

- Ensure your wallet is ETH-compatible.
- Try again and check for any error messages.
- If the issue persists, please provide a **screenshot** of the error message for further assistance.
